FEATURES

TechnoResearch's new **Flash Tuner** with its Auto Tuning feature using an O₂ wide band sensor or the bike's narrow band, is the only of its kind in the market. With its custom designed easy-to-read plug and play computer interface, This **Flash Tuner** will save time and money giving the customer a better tuned, better performing, more exact tune through the entire throttle band.

TechnoResearch has over 20 years of the highest level of 'performance EFI tuning system' worldwide for the likes of Ducati, Moto Guzzi, and the Great Harley-Davidson®. TechnoResearch is not only the best of the best; it also has the most consistent R&D software upgrades of any EFI tuning system throughout the world.

AUTO TUNING & REMOTE TECHNICAL SUPPORT

Ok all you techs, are you ready to be amazed? Say you're working on a hot custom tune big cams, pipe heads, or just a problem stock bike and you get stuck. Now the job is due and you have five more to get done before you call it a day. Dial up the pros at TechnoResearch, link up remotely and they will help guide you through the set. Just like that the **Flash Tuner** saves money, makes money, saves time and makes your customer happy. Heck, you may even make the boss happy. This proven technology has saved many tuners a long night. With thousands of custom maps, **Flash Tuner** is the answer. **Flash Tuner** is the best aftermarket alternative for your Harley.

CALL TODAY & THEY WILL PROVE IT.
